Profile

Insurance umpire, appraiser, building consultant, and public adjuster specializing in water, fire, and storm related damage. I have the unique perspective in regards to damage assessment and insurance coverage interpretation due to my 24 year career consisting of property claim management, general contractor ownership, public adjusting, and building damage consulting. My approach to dispute resolution encompasses all areas of my past experience, and the goal is to reach a fair resolution in which each party fully understands the reasoning behind any outcome.
